Joint Supplements

Joint supplements, sometimes called nutraceuticals, have been found to be highly effective relieving your dog's arthritic pain. The most common joint supplements for canine arthritis are glucosamine chondroitin. Omega 3 fatty acids also carry joint benefits. As well as skin, heart, brain, and immune support!

Glucosamine/Chondroitin supplements such as:

- Dasuquin w/ MSM (Nutramax)
- Cosequin DS (Nutramax)
- Glycoflex II or III (Vetriscience)
- Phycox (available in HA for allergy patients) (Dechra)

Omega 3 Fatty Acids supplements such as:

- Derma-3 (Ceva)
- Welactin (Nutramax)
- Free Form Snip Tips (Elanco)
- Eicosa snip caps or liquid (Dechra)

We carry Glycoflex II and Derma-3 in the clinic. All products can be ordered through our online store.

Hyaluronic Acid supplements such as: HyaFlex (available on Amazon)

CanEVA- Elk Velvet Antler- with the above supplements as well as added ingredients for joint and bone health available at caneva.ca
